Commitment to achieving net zero

Setec Consulting Engineers Ltd is committed to achieving Net Zero greenhouse gas (GHG) emissions by 2050, in line with the UK Government's Procurement Policy Note (PPN) 006 and the associated guidance on Taking Account of Carbon Reduction Plans in the Procurement of Major Government Contracts.

Baseline year: 2025

Additional details relating to the baseline emissions calculations:

This baseline covers January – September 2025 (first reporting year under PPN 006) and will transition to a full 12-month period from 2026 onwards. Setec operates as a professional design and engineering consultancy from rented offices in London and Bristol.

Baseline year emissions:

Scope	Emission Sources	Baseline Emissions (tCO ₂ e)
Scope 1 – Direct emissions	Company-owned fuels, vehicles, and refrigerants	0.00
Scope 2 – Indirect energy emissions	Purchased electricity (location-based)	0.34
Scope 3 – Other indirect emissions	Transmission & distribution losses	0.03
	Business travel (air and accommodation)	30.93
	Homeworking	19.71
	Employee commuting and other minor categories	5.72
	Total (Scopes 1 – 3)	56.73 tCO₂e

Current emissions reporting

Reporting year: 2025

Emissions	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	0.34
Scope 3 (included sources)	56.39
Total emissions	56.73

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

- By 2026 – Switch to 100% renewable electricity for both offices and obtain complete Scope 2 data.
- By 2030 – Reduce business travel emissions per employee by 50% (vs 2025 baseline).
- By 2035 – Integrate waste, water, and supplier Scope 3 data and achieve 40% overall emission reduction.

- By 2050 – Achieve Net Zero across all Scopes.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. The carbon emission reduction achieved by these schemes equate to 0.00 tCO₂e, a 0% reduction against the 2025 baseline and the measures will be in effect when performing the contract.

This is the first reporting year; completed initiatives will be reported in future years.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Adopt renewable electricity tariffs and engage with landlords to improve energy efficiency.
- Encourage rail travel over air and EV or hybrid vehicles for car hire.
- Expand remote collaboration and hybrid working to reduce travel demand.
- Promote cycle-to-work and EV salary-sacrifice schemes to reduce commuting emissions.
- Reduce paper usage and apply sustainable procurement for IT and office supplies.
- Work with landlords and suppliers to track waste and water use for future reporting.

Declaration and sign off

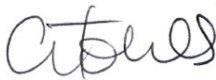

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Setec Consulting Engineers Ltd:

Date: 22/10/2026

Publication Statement

This Carbon Reduction Plan is publicly available on SCEL's website at <https://uk.setec.com/policies/> and is reviewed annually to ensure continued compliance with PPN 006.
